

International Institute of Geometric Dimensioning & Tolerancing

IIGDT and CIMA Bridge the information gap

January 11-15, 2010 IIGDT is collaborating with CIMA in Italy to provide a unique opportunity for you and your European suppliers by offering a 4.5-day GD&T Seminar in Bologna, Italy

Training will be provided utilizing IIGDT's "Combined GD&T Course" which represents our "[GD&T - Introduction & Fundamental Principles](#)" course and our "[GD&T - Advanced Applications & Analysis](#)" course.

This training will also highlight differences between the dimensioning and tolerancing standards in Italy and surrounding countries that many of the participants have more than likely been trained to so there is a clear understanding of the interpretation and application of practices defined per your company standards.

IIGDT and CIMA realize that the information chain between you and your suppliers often cross time zones and even continents. These distances result in barriers to reaching the same goal—Manufacturing Success!

Through IIGDT designed Precision GD&T Seminars all links in the chain will speak and interpret the same language.

Location:

GD SpA Via Battindarno, 91 40133 Bologna

Training Cost:

€1,100 per person

Course Times: Monday 13:00-17:00
