NACMA Annual Workshop and Conference November 2-4, 2011 Aerospace Technology Center, Montreal, Canada

NACMA Annual Workshop and Conference enjoyed a successful event in Minneapolis, MN in August 2010 where representatives from the top metrology companies met engineers, inspectors and other leaders in our industry. Showcasing the newest tools and technologies to ensure quality, reduce costs, and streamline manufacturing processes. Speakers from around the world presented thought provoking ideas on current and future projects that will affect us all.

In 2011, the annual edition of the NACMA Workshop and Conference will move to Montréal, Canada and sponsored by Centre Technologique en Aérospatiale (CTA) in their newly expanded facility. Event dates are November 2-4, 2011.

The volunteers at NACMA would like to thank you for joining us. Bringing together the

NACMA Annual Workshop and Conference November 2-4, 2011 Aerospace Technology Center, Montreal, Canada

The 2011 Workshop and Conference is being held in the newly build hanger at the Centre technologique en aérospatiale (CTA).

In 2011, CTA was able to incorporate new facilities covering 30,000 square feet following an investment of \$ 12-million. It's a brand new wing added to the ENA and is dedicated to the activities of the organization. These facilities will enable the Centre to increase its range of avionics services, next-generation metrology (non-contact inspection, CMM five-axis) in non-destructive testing next-generation robotics and general aviation.
